The biggest item on the TO-DO list for 2022-2023 was to move forward with the repairs to the outdoor throwing cage.

The following was reported to board as part of the May 2023 Office report (technically 23-24 fiscal year)

- We have had an infinite number of issues with the cage this year.
- The first stage of the process went smoothly, with the first set of doors going up with no issues.
- When we went to lift the second set of doors, the hand crank that is used to raise them broke and they fell to the ground.
- Brooke-Lynn and I spent time getting everything repaired (with assistance from Jim Murray) and then when we went to raise the doors again realized another bolt had been damaged/stripped when it fell.
- Jim assisted again, and we almost had it up safely during Spring Open – when ANOTHER section broke at the top.
- Scot Dressler and Dale Barnych had a variety of ratchet straps which allowed us to safely secure everything until the end of the meet. I returned with Scot Dressler after the meet was done and we were able to bring down one section and put up the rest so that the school meets occurring the following week were able to proceed.
- On Friday May 19<sup>th</sup>, we were able to get a boom lift delivered to the track to get the netting on the other outside cage replaced/installed.
- There are also a number of sets of broken blocks – Wayne has taken a set home to see if he can figure out the best/easiest way to repair them.
- There are also hurdles which need to be repaired, and there is a box of the black replacement brackets in the butler hut.

### Additional Equipment notes & plans for 23/24

---

- Additional new equipment has been ordered/acquired as part of the preparations for the World Police Fire Games.
- Additional repair work is obviously required on the infield throwing cage prior to the Games.
- New laptops are desperately needed for our Results system.
- New Pole Vault mats will be ordered this summer and will be moved indoors to replace the current “indoor” mats which have now officially become outdoor mats.
  - A small grant in the amount of \$5625 has been secured through the Canada Summer Games Legacy fund to go towards this purchase. The University of MB will also be contributing at least half of the cost for this purchase.
