2025-2026 Equipment Report

Highlighted equipment related expenditures*	
TOTAL cash expenditures on Equipment purchases and repairs 25-26 fiscal year	\$92,840
Starter's Ammo	
Starting Blocks	
Indoor throwing implements	
Photo timing equipment	
Replacement Flash Timing system	
Replacement printer stopwatches & multi-lane stopwatch	
Hip numbers	
Photo & Throws Tape	
Radio repair & replacement	
2x High Jump foam top cover & new weather cover	
Indoor & Outdoor horizontal jumps take off boards	
Outdoor throws cage asphalt work	

** Note: this total shows the overall total of equipment related purchases and expense BEFORE the audit process, whereby some major purchases are capitalized over a set period of time. As a result, the final audited statements will show a different balance related to equipment.*

University of MB staff were exceptionally helpful in designing and building the new indoor throws barriers. Hopefully these will help minimize some of the damage the implements sustain during regular training.

Additional Equipment notes &/or plans for 27/28

Final work on deficiency list related to the asphalt work around the outside throwing area is being completed. Ongoing repair & patching work is also being scheduled for the track surface through the U of M.

Additional horizontal jumps take off boards have been manufactured for the outdoor facility.

Additional plyo boxes are being built, multiple have been requested.

A substantial round of repairs were completed on the black GILL starting blocks during the indoor season in preparation for U Sports Championships. However, ongoing repair and replacements will need to be managed throughout the upcoming year as they continue to sustain damage.

The addition of the blue starting blocks for use at high school events was positive and did save some wear and tear.

Additional throws implements and training resources (ex: Med balls) are still desperately needed – unfortunately those had to take a back seat due to the other major “emergency” purchases that were required during 25-26. These items will need to be revisited and scheduled for 26-27.
